Stepping up to high definition WUXGA resolution just got easier and more affordable with the InFocus IN5110 LCD projector. Show off your high resolution data and 1080p video sources as they were intended; without scaling, compression, or adjusting the screen settings. The IN5110's WUXGA 1920 x 1200 resolution covers it all so you don't have to think about it. Installation is fast and affordable because the IN5110 uses the same ceiling mount as previous InFocus projectors and has a flexible zoom lens to provide the ideal screen size. All you have to do is unplug the old one and replace it with your new IN5110 - same location, mount, and cables.
